

Offshore, Subsea and Marine Consulting Services

Endeavor Management has built a very experienced team to support oil and gas offshore projects in all types of offshore facilities, as well as drilling and completions operations spanning all phases of exploration and production. Our team also brings significant experience with offshore vessels and installation activities.

Endeavor Offshore, Subsea and Marine (OSM) team members have spent their careers in international oil and gas markets for operators or service companies and now their knowledge and expertise is available to Endeavor clients as required. Specifically, the OSM group can:

- Provide personnel to design, direct, staff, and execute a project from concept identification to delivery; ensuring the client's objectives are met and the benefits maximized
- Identify alternative concepts for field development and evaluate all possible solutions in support of concept selection
- Perform peer reviews during project execution
- Review and develop bid strategies and help define client requirements from a third-party perspective
- Perform project and process audits related to project management and other related activities
- Review and provide feedback of new technologies
- Identify alliance partners and possible acquisitions
- Develop company strategy and implement specific strategic initiatives
- Serve as Subject Matter Experts in areas that include floating production systems, subsea systems, fixed facilities, offshore installation and field architecture

Endeavor Management is a transformational strategy firm that works with oil and gas companies globally. We provide Leadership Alignment/Coaching, Transformational Strategy and Change Management, market research as well as specialized technical consulting on offshore development and production. We understand oil and gas technology, its applications, and how to achieve and measure its effectiveness.
